

CONTENTS OF CHEMICAL AND PROCESS ENGINEERING

VOL. 42, 2021

ISSUE 1

Gaweł Sołowski, Izabela Konkol, Marwa Shalaby, Adam Cenian, Methane and hydrogen production from potato wastes and wheat straw under dark fermentation	3
Paweł Gierycz, Artur Poświata, Production and formation modelling of CaCO ₃ in multiphase reactions – A review	15
Adrian Szałek, Mirosław Szukiewicz, Elżbieta Chmiel-Szukiewicz, Kinetic investigations of heterogeneous reactor processes – Optimization of experiments	35
Michał Wrzecionek, Joanna Howis, Paulina H. Marek, Paweł Ruśkowski, Agnieszka Gadomska-Gajadhur, The catalyst-free polytransesterification for obtaining linear PGS optimized with use of 2 ² factorial design	43
Suondos K.A. Barno, Sarmad A. Rashid, Ammar S. Abbas, Modeling and simulation of an ideal plug flow reactor for synthesis of ethyl oleate using homogeneous acid catalyst	53

ISSUE 2

Eugeniusz Molga, Editor's notes. Special Issues of Chemical and Process Engineering. In Memory of Professor Jerzy Bałdyga	73
Ryszard Pohorecki, Professor Jerzy Bałdyga – Personal memories	75
Andrzej W. Pacek, Alvin W. Nienow, High flow, low shear impellers versus high shear impellers; dispersion of oil drops in water and other examples	77
Alex Hannam, Trevor Sparks, N. Gül Özcan-Taşkın, Power characteristics of inline rotor-stators with different head designs	91
Radosław Krzosa, Krzysztof Wojtas, Jakub Golec, Łukasz Makowski, Wojciech Orciuch, Radosław Adamek, Modeling particle deagglomeration in a batch homogenizer using full CFD and mechanistic models	105
Stanisław Ledakowicz, Olexa Piddubniak, Analysis of non-stationary temperature field generated by a shaftless screw conveyor heated by Joule–Lenz effect	119
Joanna Karcz, Jolanta Szoplik, Marta Major-Godlewska, Magdalena Cudak, Anna Kiełbus-Rapała, Agitation efficiency of different physical systems	139

Rafał Rakoczy, Marian Kordas, Agata Markowska-Szczupak, Maciej Konopacki, Adrian Augustyniak, Joanna Jabłońska, Oliwia Paszkiewicz, Kamila Dubrowska, Grzegorz Story, Anna Story, Katarzyna Ziętarska, Dawid Sołoducha, Tomasz Borowski, Marta Roszak, Bartłomiej Grygorcewicz, Barbara Dołęgowska, Studies of a mixing process induced by a rotating magnetic field with the application of magnetic particles	157
Anna Story, Grzegorz Story, Zdzisław Jaworski, Experimental and numerical investigation of axial and tangential forces in a stirred tank with yield-stress fluids	173

ISSUE 3

Joël Bertrand, Jerzy Bałdyga – in memory	195
Suzuka Iwasawa, Honami Kubo, Katsuhide Takenaka, Sandro Pintus, Francesco Maluta, Giuseppina Montante, Alessandro Paglianti, Analysis of liquid blending dynamics with Maxblend impellers by Electrical Resistance Tomography	197
Roman Formánek, Radek Šulc, The homogeneity of immiscible liquid-liquid dispersion in a vessel agitated by Rushton turbine	209
Katarzyna Bizon, Bolesław Tabiś, Phenomenological and numerical issues concerning dynamics of nonisobaric multicomponent diffusion of gases in macroporous media	223
Robert Cherbański, Ewelina Franczyk, Michał Lewak, Piotr Machniewski, Eugeniusz Molga, Modelling of methane dry reforming over Ni/CaO-Al ₂ O ₃ catalyst	235
Tomasz R. Sosnowski, Kamil Janeczek, Karolina Grzywna, Andrzej Emeryk, Mass and volume balances of nebulization processes for the determination of the expected dose of liquid medicines delivered by inhalation	253
Agnieszka Markowska-Radomska, Ewa Dluska, Agata Metera, Maria Wojcieszak, Multiple emulsions for simultaneous active agents delivery in a skin topical application	263
Michał Wojasiński, Tomasz Ciach, Solution blow spun poly-L-lactic acid/ceramic fibrous composites for bone implant applications	275

ISSUE 4

Guido Lupieri, Ioannis Bagkeris, Jo J.M. Janssen, Adam J. Kowalski, Numerical study of a cone mill for emulsion preparation: Hydrodynamics and population balance modelling	295
Andrzej I. Stankiewicz, Marek Henczka, Eugeniusz Molga, Teaching chemical engineering in Europe – Developments, dilemmas and practical examples	321
Andrzej Krasiński, Łukasz Sołtan, Jakub Kozyrski, The effect of solids on the interfacial rheology and the performance of coalescence	337
Jan Krzysztoforski, Karim Khayrat, Marek Henczka, Patrick Jenny, The effect of capillary pumping on the course of cleaning porous materials containing liquid contaminants using supercritical fluids – a pore network study	349
Grzegorz Tyl, Juliusz Kondracki, Magdalena Jasińska, Effect of flow structure and colloidal forces on aggregation rate of small solid particles suspended in aqueous solutions	369

Antoni Rozeń, Janusz Kopytowski, Energetic efficiency of mixing in a periodically reoriented Dean flow	391
Donata Konopacka-Łyskawa, Natalia Czaplicka, Andrzej Szefer, CaO-based high temperature CO ₂ sorbents – Literature review	411
Michał Dymek, Elżbieta Sikora, Emulsions as vehicles for the controlled release of astaxanthin in topical application	439
Acknowledgments to Reviewers 2021	451
