

CONTENTS

Biodegradation of Methyl Isobutyl Ketone (MIBK) by <i>Fusarium Solani</i> – Krystyna Przybulewska, Andrzej Wieczorek	3
The Use of Disintegrated Foam to Accelerate Anaerobic Digestion of Activated Sludge – Alicja Machnicka, Klaudiusz Grübel, Jan Suschka	11
Wastewater Purification by an Organic Soil and Grass-Mixture – Urszula Kotowska, Teresa Włodarczyk, Barbara Witkowska-Walczak, Cezary Sławiński	21
Generation and Management of Wastewater from Ground Water Treatment – Krzysztof Piaskowski	35
Fractionation of Chosen Heavy Metals in Bottom Sediments of Small Water Reservoirs – Marek Madeyski, Marek Tarnawski, Czesława Jasiewicz, Agnieszka Baran	47
Qualitative and Quantitative Characteristics of Organic Matter in the Water of a Small Reservoir – Katarzyna Parszuto, Renata Tandyrak, Jarosław Galik	59
Appraisal of Bottom Sediment Pollution with Heavy Metals of Small Water Reservoirs Located in South Poland – Bogusław Michalec, Marek Tarnawski	73
Effect of Type and Proportion of Different Structure-Creating Additions on the Inactivation Rate of Pathogenic Bacteria in Sewage Sludge Composting in a Cybernetic Bioreactor – Agnieszka Wolna-Maruwka, Jacek Dach	87
Impact of Uncontrolled Waste Dumping on Soil Chemical and Biochemical Properties – Elżbieta Jolanta Bielińska, Agnieszka Mocek-Płóćiniak	101
Possibility of Using Permeable Reactive Barrier in Two Selected Dumping Sites – Tomasz Suponik, Marcin Lutyński	109
Solid Phase Anaerobic Bioremediation of Soil from the “Tomb” Area Contaminated with Chlorinated Pesticides – Tomasz Baczyński	123
Some Heavy Metals Accumulation and Distribution in <i>Typha Latifolia L.</i> from Lake Wielkie in Poland – Agnieszka Klink, Józef Krawczyk, Barbara Letachowicz, Magdalena Wisłocka	135
