

# Bulletin of the Polish Academy of Sciences Technical Sciences (BPASTS)

Volume 73, No. 1 SPECIAL SECTION

January 2025

## CONTENTS: SPECIAL SECTION on Sustainability, reliability, and durability of civil engineering structures

### **Sustainability, reliability, and durability of civil engineering structures**

Agnieszka Tomaszewska, Jacek Szafran, Bettina Brune, Krzysztof Wilde

### **Trusses of the smallest total potential energy**

Sławomir Czarnecki, Tomasz Lewiński

### **Determination of wind force acting on an object in the shape of a bent pipe**

Agnieszka Padewska-Jurczak, Zbigniew Buliński, Tomasz Krysiński

### **Random field-based simulational identification of potential levels of material imperfections of adhesive-bonded joints**

Karol Winkelmann, Jan Faizullah, Łukasz Smakosz, Violetta Konopińska-Zmysłowska, Victor Eremeyev, Marcin Kujawa

### **Introduction to the investigation of reproduction of the real geometry of UBM panels**

Ryszard Walentyński, Robert Cybulski, Henryk Myrcik

### **Assessing the equivalent spring modelling method of CFS elements encased in ultra-lightweight concrete**

Ahmed Alabedi, Péter Hegyi

### **The influence of brace to chord rotational connection stiffness on stability of the truss**

Marcin Krajewski

### **Efficacy of modal curvature damage detection in various pre-damage data assumptions and modal identification techniques**

Milena Drozdowska, Marek Szafranski, Anna Szafranska, Agnieszka Tomaszewska

### **Evaluation of the factors determining thermal comfort and occupational health conditions of employees in multi-storey business buildings in the light of expert experiences**

Murat Cal, Fatih Yilmaz
