

2nd Polish-Ukrainian International Conference on **Current Problems in Metal Structures**

The event is being held in conjunction with the
80th birthday anniversary of Professor Jerzy Ziółko

27 - 28 November, 2014
at Gdańsk University of Technology, Poland

Main Topics:

The conference aims to bring together the expertise of scientists and engineers in academia and industry in the field of metal structures. The conference will cover all research topics relevant to theory, design, and manufacturing of metal structures including numerical simulations, theoretical investigations as well as experimental case studies.

Official Languages:

Polish, English, Ukrainian and Russian are the official languages of the 2nd Polish-Ukrainian International Conference on Current Problems in Metal Structures.
